Akshay Sharma | Woodbridge, ON | akshaysharma5432@gmail.com | 289-889-0549 | Portfolio | LinkedIn | GitHub | Work Authorization: Canada (PR)

Summary

Front-End Web Developer with 5+ years building and publishing responsive web content across enterprise-scale public-facing websites. Proficient in HTML5, CSS3, JavaScript, and CMS platforms including WordPress, Shopify Liquid, and **Adobe Experience Manager (AEM)**. Built an enterprise-grade internal application at FedEx serving 80+ users, improving efficiency by 80% through automation and real-time dashboards. Strong in cross-browser/multi-device delivery, WCAG 2.1 accessibility, SEO best practices, and Agile collaboration using **JIRA** and **Confluence**.

Skills

Front-End: HTML5, CSS3, CSS Grid, Flexbox, Responsive Design, JavaScript (ES6+), React, Next.js, TypeScript, Tailwind CSS, Bootstrap
CMS & Templating: Adobe Experience Manager (AEM) – authoring, content publishing workflows; WordPress; Shopify Liquid
Web Standards: Cross-Browser Compatibility, WCAG 2.1 Accessibility, SEO Best Practices, Lighthouse Auditing, Multi-Platform Delivery
Back-End & Data: Node.js, Express.js, REST APIs, PostgreSQL, MongoDB, Supabase
Tools: JIRA, Confluence, Git/GitHub, Agile/Scrum, CI/CD, Jest, React Testing Library, Power Apps, Power Automate, SharePoint

Professional Experience

Web Developer (Freelance Contractor) | Emkao Foods – Vancouver, BC (Remote) *Feb 2024 – Present*

- Develop and maintain responsive, SEO-optimized web pages across Shopify storefront, ensuring **cross-browser compatibility** and consistent rendering on desktop, tablet, and mobile devices.
- Authored and published web content using Shopify's Liquid templating engine and CMS workflows; managed promotional pages, campaign sections, and structured content updates meeting WCAG 2.1 standards.
- Collaborate with business stakeholders on requirements and UX iterations; track deliverables in **JIRA** and document specs in **Confluence**.

FedEx – Mississauga / Vaughan, ON

Cash Applications Specialist | Jan 2026 – Present

Internal Application Developer (Part-Time) | *Sep 2024 – Jan 2026*

- Designed and delivered **CaseLog**, an enterprise-grade internal application serving 80+ users across multiple stations (25,000+ interactions), using Power Apps, Power Automate, and SharePoint.
- Automated daily/weekly reporting workflows, reducing manual effort by **80%**; built role-based UI screens, operational dashboards, and multi-station data validation.
- CaseLog selected for FedEx's **Peer-to-Peer Quality Awards (PPQA)** – peer-nominated recognition for quality and innovation. Scaled from single-station pilot to 5+ locations.
- Partnered with cross-functional teams using **Agile practices**; managed work items in JIRA, documentation in Confluence, and release notes per deployment cycle.

Full-Stack Developer (Contract) | Ecomtent – Toronto, ON | Jan 2023 – Feb 2024

- Built responsive React/Next.js UI features with TypeScript, integrating front-end components with CMS-managed content including AEM-authored pages, ensuring pixel-perfect cross-browser rendering across desktop, tablet, and mobile.
- Integrated Stripe payments via Node.js/Express; maintained quality through **unit & integration testing** (Jest, RTL) and collaborative code reviews.
- Managed sprint tasks in **JIRA** and technical docs in **Confluence** within an Agile Scrum team across onshore and offshore collaborators.

Earlier Development Experience (2017–2022)

- **Events365** – Toronto, ON | Web Developer | 2020 — Built 30+ responsive, accessible pages using HTML5, CSS3, and WordPress CMS.
- **TEJ Electric** – Brampton, ON | Front-End Developer | 2019–2020 — Responsive React UI refresh with cross-browser testing.
- **DSG Papers** – Patiala, India | WordPress Developer | 2017–2019 — Custom themes, plugins, SEO architecture, content workflows.
- **DXE Technologies** – Pune, India | Software Engineer | 2021–2022 — Node.js/Express apps with REST APIs and Git workflows.
